

# SPC Flooring

SPC flooring is a premium, rigid-core luxury vinyl flooring known for being 100% waterproof and exceptionally durable, with a moisture-proof solid core constructed of limestone, PVC and stabilizers. Its surface layer provides protection from dirt and moisture, has antibacterial protection, is resistant to UV rays and stains, and has antistatic and sound-reducing qualities, among other advantages.

## TECHNICAL DATA

SPC Flooring Specification	
Color	98001-1; 98006-1
Thickness	5.5mm
Size:	48" x 7"(1220*183mm)
Top wearlayer	20mil
Backing Foam	IXPE 1.5mm
Click system	Unilin Click
Surface Texture	Embossed
Bevel	Micro groove
Coating	Super anti-scratching UVcoating
Package	12 pcs per box; 28.84sqft per box
Usage	Bedroom, Kitchen, Basements, Home, School, Hospital, Mall, Commercial to use.
Features	Fire Retardant, Formaldehyde Free, Water Proof, Easy Installation, Scratch Resistant, Easy to Clean, Slip Resistant, Prevent Pet Damage, Noise Reduction

Maintenance

Simple Installation

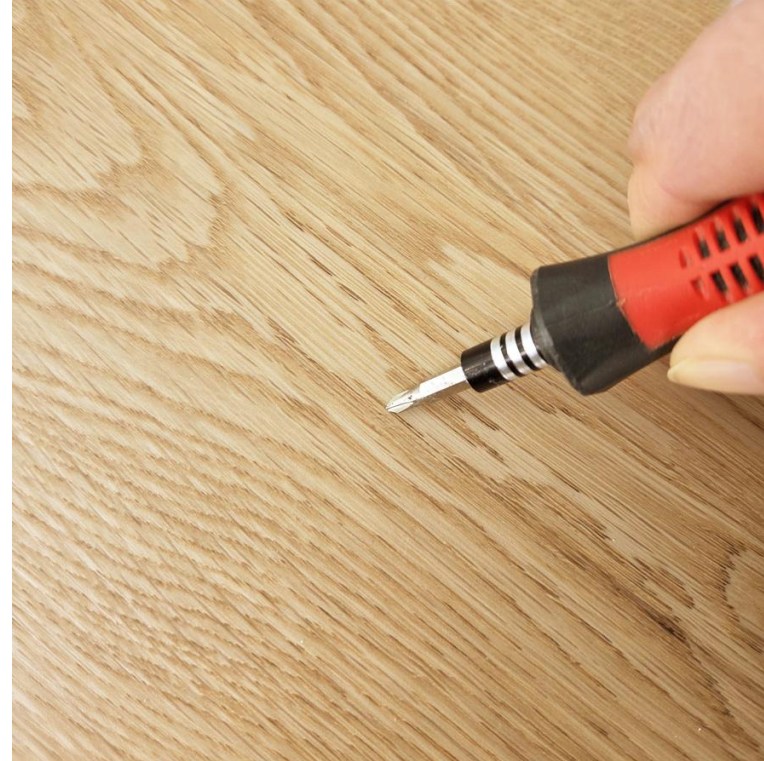

Easy Repairing

# KEY FEATURES

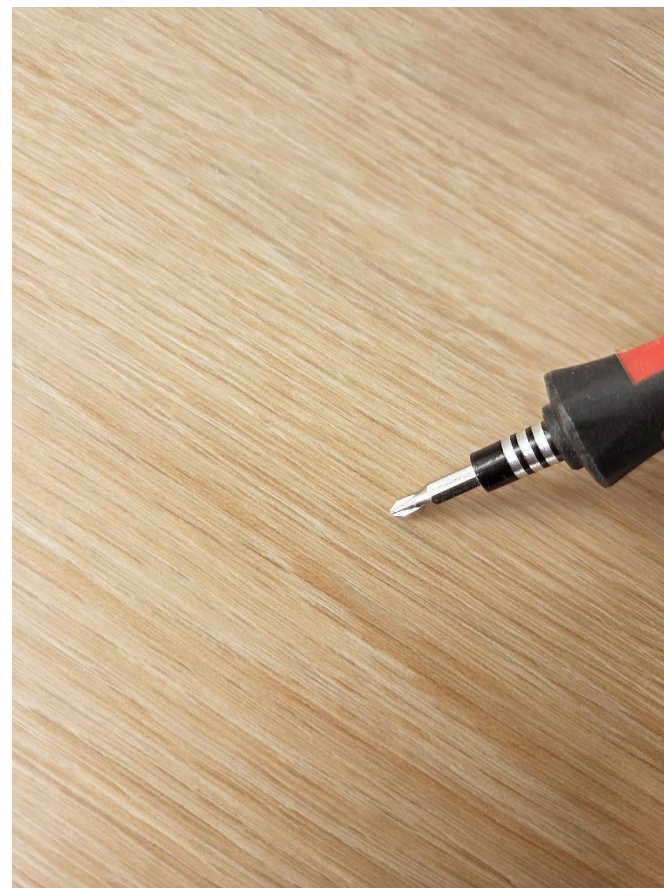

- 100% Waterproof Core: Spills, splashes, and moisture are no concern. Perfect for kitchens, bathrooms, and etc.
- Extremely Durable & Scratch-Resistant: With a tough wear layer (up to 20mil), it withstands heavy foot traffic, pets, and furniture, maintaining its beauty for years.
- Ultra-Stable & Works with Underfloor Heating: The rigid stone-plastic core prevents expansion/contraction, making it ideal for installation over radiant heat.
- Easiest Click-Lock Installation: Featuring advanced locking systems like Uniclic for a fast, glue-free, and secure DIY-friendly install.
- Authentic Realistic Designs: Enjoy stunning, high-definition visuals with textured embossed surfaces that look and feel like real wood or stone.
- Healthier Home Choice: Formaldehyde-free, contributing to better indoor air quality. Safe for families.
- Easy Care & Low Maintenance: Simple sweeping and occasional damp mopping keep it looking brand new.

## **Precautions for SPC floor installation**

1. Handle with care during transportation to avoid damaging the floors click. Please place it flat on the flat ground and not upright or sideways.
2. The ground shall be flat and clean, and the height difference shall not exceed plus or minus 1mm. It is recommended to make ground leveling or self leveling first.
3. Leave 8mm-10mm expansion joints around when installing the SPC floor.
4. If the area exceeds 300 square meters and the length or width exceeds 10 meters, it is necessary to partition the floor and add expansion joints.
5. 1mm-1.5mm SPC floor film or mute pad can be selected under the floor and materials such as floor mat treasure cannot be used.
6. During the installation process, the latch can be buckled in place gently. Do not knock the click with tools or heavy objects to avoid over tight installation of the floor and damage to the click.
7. After installation, pay attention to protect the flooring and daily maintenance.
